

RFP No. 001/MG/0714

List of equipment

Item	Description	Quantity	Technical Requirements
1	Network Analyzer 50GHz	1	TR-001
2	Millimeter wave converter 75-110GHz	Set	TR-002
3	Broadband microwave absorber	Set	TR-003
4	Microwave cables	Set	TR-004
5	Antennae	Set	TR-005
6	RCS Measurement and processing software	1	TR-006
7	System installation and training	1	TR-007

Network Analyzer 50GHz

Requirements for Network Analyzer 50GHz RFP No. 001/MG/0714

Miranda Sp. z o.o. tel.: +48 63 28 00 100 **www.miranda.pl** ul. Jedwabnicza 1 fax: +48 63 28 00 111 miranda@miranda.pl 62-700 Turek

The Network Analyzer will be supplied to the customer According to the Technical specification. The Network Analyzer must be able to measure phase/vector.

2. Technical Specification

No.	Parameter	Minimum Requirement
		The minimum configuration is:
		- Four port device
1	Configuration	- Two built-in generators
		- Possibility to connect 75-110GHz converters without the need to expand the analyzer hardware
2	Frequency range	10MHz - 50GHz
3	Frequency resolution	≤ 1Hz
4	Measurement Bandwidth	1Hz ÷ 1Mzhz
		From ≤-30dBm to:
_	Adjustable output level (without the	≥ 13 dBm for 50 MHz ≤ f <20GHz
5	option of additional silencers, without the option of direct I / O)	≥ +12 dBm to 20GHz ≤ f <35GHz
		≥ +10 dBm to 35GHz ≤ f ≤ 50GHz
		≥ 125dB for 500MHz ≤ f <2 GHz
		≥ 130 dB for 2 GHz ≤ f <20GHz
6	Dynamics (IF 10Hz, without the option of additional silencers,	≥ 125dB for 20GHz ≤ f <24GHz
3.000	without the option of direct I / O)	≥ 120 dB to 24 GHz ≤ f ≤ 40GHz
		≥ 115dB for 40GHz ≤ f ≤ 45GHz
		≥ 110dB for 45GHz ≤ f ≤ 50GHz

www.miranda.pl ul. Jedwabnicza 1 fax: +48 63 28 00 111 miranda@miranda.pl

7	Connections	50Ω , 2.4mm type, male, with an additional flange reinforced mechanically
8	Measurement speed at (IF 1MHz, CW)	≤ 3.5μs
9	Typical switching time (401 points, full bandwidth)	≤ 32ms (without correction) for IF = 100kHz ≤ 41 ms (calibration TOSM) for IF = 100kHz ≤ 28ms (without correction) for IF = 1MHz ≤ 33 ms (calibration TOSM) for IF = 1MHz
10	BIAS	Connectors for external DC (BIAS) for sockets PORT 1 to 4, (one connector assigned to one port)
11	Control Interface	LAN. GPIB
12	Other requirements	- Calibration Kit female, male - 50GHz

3. Warranty

Minimum 3 years

Millimeter wave converter 75-110GHz

Requirements for Millimeter wave converter 75-110GHz RFP No. 001/MG/0714

Miranda Sp. z o.o. tel.: +48 63 28 00 100 **www.miranda.pl** ul. Jedwabnicza 1 fax: +48 63 28 00 111 miranda@miranda.pl 62-700 Turek

LUBAWAGROUP

Page **5** of **20**

The Millimeter wave converter 75-110GHz will be supplied to the customer According to the Technical specification. The Millimeter wave converter 75-110GHz must be compatible with the Network Analyzer as specified in TR-001.

2. Technical Specification

No.	Parameter	Minimum requirement
1	Configuration	Set of two converters 75-110GHz Frequency range with electronic level control, necessary connecting cables to the network analyzer L=1.5m
2	Frequency Range	75GHz – 110GHz
3	Output level (at output of +7dbm from Network Analyzer)	\geq -3 dBm, typ. 0dBm \geq +12 dBm to 20GHz \leq f <35GHz \geq +10 dBm to 35GHz \leq f \leq 50GHz
4	Output attenuation adjustment	Electronic control $\leq 0 dB \div \geq 25 dB$ The possibility of further reduction of the power level by reducing the level of network analyzer
5	System Dynamics (IF=10Hz)	≥ 95dB
6	Other Requirements	Calibration kit The Millimeter converter and Network Analyzer equipment should preferably be from the same manufacturer.

3. Warranty

Minimum 3 years

Microwave absorbers

Requirements for Broadband Microwave Absorbers RFP No. 001/MG/0714

Miranda Sp. z o.o. tel.: +48 63 28 00 100 ut. Jedwabnicza 1 fax: +48 63 28 00 111 62-700 Turek

www.miranda.pl miranda@miranda.pl

LUBAWAGROUP

Page **7** of **20**

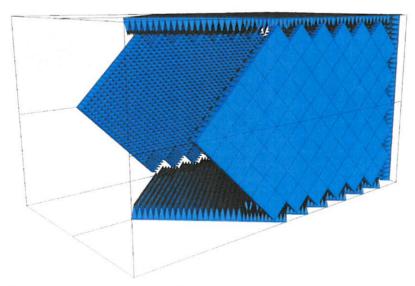

The microwave absorbers will be supplied to the customer in three various types listed in the Technical specification. Together with the absorbers the correct amount of glue for fixing the microwave absorbers will be supplied by the vendor.

The customer intends to purchase microwave absorbers designed to reduce the reflection of microwaves in the anechoic test chamber. The internal dimensions of the test chamber are as follows:

Height	Width	Depth
5.5m	6.0m	10.0m

The customer will perform installation of the microwave absorbers by gluing to the ceiling and walls of the structure, it is required that the vendor supply detailed layout design and mounting instructions. The mounting will be performed in a so called "Diamond" configuration to give best results with RCS measurements.

An illustration of this configuration is shown below:

NOTE: illustration does not show all absorbers required.

ul. Jedwabnicza 1 62-700 Turek

3. Design

The design and layout of the absorbers is to be provided by the vendor to best suit RCS type measurements within the dimensions of the structure outlined in point 1. Information.

4. Fire retardancy

It is a required that all microwave absorbers meet the following standard for fire retardancy:

DIN 4102 Class B2

5. Warranty

LUBAWAGROUP

Page **16** of **20**

The software required by The Customer is defined within this technical specification. The vendor is to provide a detailed requirement for the PC and operating system required to run the software. The Customer will provide the PC according to the Vendors specification.

2. Technical specification

General features

- Measurement control of VNA and positioner/turntable
- Real-time presentation of measurements and positioner/turntable
- Video during measurements
- Modular design
 - o New features can be added on customer requests
 - o Extendable to other VNA and positioner/turntable vendors
 - o Extensive camera support:
 - Visible light
 - LWIR, SWIR, NIR
- Correlates positioner/turntable & video with measurement data
- Database for data organization
- Flexible processing

Processing

- Selectable data domain
 - o Time/Range for RCS and reflectivity measurements
 - o Time/Frequency for antenna measurements
- Data resampling using either coherent and non-coherent integration
- Phase shifting / phase alignement
- Data subset window functions
- Relative and absolute RCS Calibration
- Background subtraction
- Software/Hardware range gating
- **ISAR**
 - o Polar reformatting
 - o Window functions
 - Separate cross and downrange functions

Miranda Sp. z o.o. tel.: +48 63 28 00 100 www.miranda.pl ul. Jedwabnicza 1 62-700 Turek

fax: +48 63 28 00 111

miranda@miranda.pl

- o Video generation
- Statistical functions
- Easy integration of plots in report

Presentation

- Synchronization across:
 - Linear range plot
 - o Linear azimuth plot
 - o Linear frequency distribution plot
 - Scatter plot
 - o High Resolution Range plot
 - o High Resolution Frequency plot
 - o ISAR/Doppler plot
 - o Polar plots
 - o Camera image capture
- Report generation
 - o Automatic/manual

3. Technical support

The vendor shall provide technical support and assistance to the Customer for a minimum period of 24 months after training has been completed.

ul. Jedwabnicza 1 fax: +48 63 28 00 111 62-700 Turek

System Installation and training

Requirements for System Installation and training RFP No. 001/MG/0714

Miranda Sp. z o.o. tel.: +48 63 28 00 100 ul. Jedwabnicza 1 fax: +48 63 28 00 111 62-700 Turek

www.miranda.pl miranda@miranda.pl

1. Overview

The Customer requires that the Vendor include in their proposal information regarding the schedules for system installation and for the training of The Customers staff.

The Customer will be responsible for the construction of the structure which will house the Anechoic Chamber, this construction will be made of timber lined internally with aluminium or zinc coated steel.

The Microwave absorbers will be glued to the ceiling and walls by The Customer and it is a requirement that a detailed layout design and installation instruction be provided together with the vendor's offer. The Microwave Absorbers on the floor will not be glued in place to allow for removal providing access to the whole floor space of the chamber.

2. Schedule

The customer requires that the system be delivered, installed and training be performed according to the table below. The vendor shall provide a delivery schedule for all items.

Phase 1	Delivery of Microwave absorbers and glue to Customers facility	The customer will install Microwave absorbers
Phase 2	Delivery of: Network Analyzer Millimeter wave converter Microwave cables Antennae RCS measurement & Processing software	Delivery of all components to The Customer
Phase 3	Vendor installation and testing	On site at The Customers facility
Phase 4	Training	On site at The customers Facility
